Instructions for using the 3165

Insert file into tool as in photo and clamp it lightly by turning the knob **A**. The adjustment screw **B** compensates for the thickness of various files. Turn it in just enough to touch the file after knob **A** has been tightened.

It is usually best to pull the tool toward you or in the **C** direction. Be sure that the file is inserted to in tool with correct cutting direction.

The angle adjustment is made by selecting the angle with dial **E** and aligning it to the arrow on the tool.
